EXPERIENCE

Quomodo Systems Limited, Lagos, Nigeria— *Backend developer*

July 2020 - present

Selected as a frontend engineer of which I later transitioned to backend development out of more than 200 applicants.

Selected accomplishments:

- I was in charge of building the API's the frontend guys consumed (primarily using CRUD oppression in Asp .Net Web API).
- Resolved memory corruption and other technical issues by leveraging strengths in coding and debugging.
- Worked with the database using both the code-first approach and the database approach (primarily using MySql as the database).
- I also tested the APIs created to be sure they are working and are bug-free (primarily using Postman).

Melhor Investment, Remote— *WordPress developer*

January 2020 - present

Selected as a frontend engineer out of more than 150 applicants.

Selected accomplishments:

- I built the company website using WordPress and after building I was asked to maintain it which I still do till now (primarily using HTML, CSS, BootStrap, JavaScript, and WordPress).
- Used SEO best practices to optimize Web site for search engine rankings and improved functionality of the company Website.
